Instructor Led Virtual Training

The ACI-ICAO Management of Airport Security course provides guidance to aviation security personnel at a managerial level on planning, coordinating and implementing airport security preventative measures and pro-active initiatives that are in accordance with national programmes and airport industry best practices.

Course Benefits

By the end of this course students will be able to:

- Explain the origin and purpose of International Civil Aviation Organization (ICAO) aviation security related legal instruments for States such as Annex 17 and the Aviation Security Manual (Doc 8973)
- Apply the basic concepts of management to aviation security and explain the specialist's role as aviation security manager
- Analyze the core components of, and the roles within an effective security team
- Evaluate options, benefits and disadvantages of outsourcing security activities
- Review the development of aviation security programmes and Standard Operating Procedures (SOP)
- Analyze an airport emergency plan and determine how to manage the security response action necessary in security emergencies involving aircraft, terminal buildings and airport facilities
- Identify and assess their own airport security plan based on their national requirements that comply with ICAO and industry best practices with the use of practical case studies and simulation exercises
- Implement a training programme for airport security and non-security staff
- Implement a robust quality control programme and a process of continuous improvement
- Set up procedures and mechanisms for reporting and recording security incidents
- Set up and run an airport security committee
- Implement regular reporting mechanisms and communications channels with intelligence agencies
