Instructor Led Virtual Training.

The SMxP Course aims to provide qualified Safety Management System (SMS) and State Safety Programme (SSP) staff with a comprehensive application of operational safety management processes and practical examples on the use of IT tools to enhance efficiency and effectiveness of safety management activities.

Important **** Please note that the Online Safety Management Training Course is a mandatory prerequisite for the classroom course of the Safety Management for Practitioners (SMxP).

Course Benefits

Upon completion of the course, participants will be able to:

- Identify hazards following a systematic and consistent approach;
- Mitigate safety risks following a systematic and consistent approach;
- Manage changes to the system in a safe manner;
- Assess safety reports through a safety screening and internal investigation;
- Prepare a safety audit/survey for assessing performance of the process;
- Design a safety performance monitoring scheme.

Who Should Attend

- State regulatory personnel involved in the implementation and operation of the State Safety Programme (SSP)
