This program is aimed at equipping employees in direct contact with the travelling public and all airport employees in general on how to respond to bomb threats; in particular trainees should know how to respond and how to notify airport authorities of the threat. Airport personnel should be trained on how to search for bombs using the right procedures. The program also prepares employees on the action to be taken in case of an airport evacuation and what their roles are in ensuring that operations are disrupted minimally or operations return to normal as soon as practicable.

Course Benefits

By the end of the program, participants will be able to:

- Understand ICAO Security Requirements, structure and organization
- Recall the historical statistical data on Attacks and Terrorism against civil aviation
- Examine in more detail the relationship between Threat, Vulnerability and Risk, and appreciate the impact this has on airline/airport operations
- Analyze and determine the Threat and Vulnerability criteria
- Actively identify the Threat and to understand how to constantly review its level Key Assets
- Why do we need Threat Assessment
- Examine other areas of Risk to continued airline/airport viability
- Risk Determination, Analysis, Assessment and Management
- Recall how aviation measures are developed to prevent acts of unlawful interference
- Make threat assessment, analysis, vulnerability assessment, risk determination, risk assessment and risk management
- Develop an agreed approach to managing risks which involving all the appropriate stakeholders, and clearly identifying accountabilities and roles.
